

# The Bridge

## Candlebox

Well, she's not the kind of girl  
That you forget about  
But she walks along the bridge  
Is she considering getting out But, my friend, when the world comes crashing down  
Yea, my friend, well who is gonna catch you now She says save me, save me  
'Cause it's a long way down, long way down  
'Cause it's a long way down, a long way down, my friend Well she's locked away inside  
Her mind keeps spinning round  
'Cause it's a leap of faith from all  
All the scars that hold her down. But, my friend, when your candle's burning out  
Yea, my friend, well who's gonna light it now She says save me, save me  
'Cause it's a long way down, long way down  
'Cause it's a long way down, a long way down, my friend Oooh, she never had a reason  
never had a second guess  
never been much easier than this  
it's never been much easier She says save me, save me  
'Cause it's a long way down, long way down  
'Cause it's a long way down, long way down  
'Cause it's a long way down, long way down  
'Cause it's a long way down, long way down, my friend A long way down [x28]
