

Always

Bag Raiders

Open your eyes, take a look, if you follow I will lead the way
It's never the same looking back, we don't wanna live in yesterday
You and I are alright because together we're the lock and the key
Come on put your hand in my hand, live far from it we can both be freeCause you~ you make me feelAlways
when I see you darling, you're up in the clouds above
And baby tonight, you got me so damn high that I think this could be love
And tell me if you think sometimes that the feeling gets too much
Cause baby tonight you got me so messed up that I think this could be loveSomething unknown now I seen twas
only you who woke me up from the daze
That we'll surely go together, you're the fire that sets my heart ablaze
Won't be long now baby til the only time I have is you
Every step we take together is a step nearer to feeling trueCause you~ you make me feelAlways when I see you
darling, you're up in the clouds above
And baby tonight, you got me so damn high that I think this could be love
And tell me if you think sometimes that the feeling gets too much
Cause baby tonight you got me so messed up that I think this could be love
