

Our Special Place

The Heavy

Some men sayin' I've been lost
I've been gone so long, I'm a ghost
With the face of a man that you know
Trying to say that they don't know me no more While the sunshine and the rain
Always walking by my side just the same
But my friends all feel away
I guess baby what I'm trying to say They can't take me
They can't take me
Take me to that place where we go
They can't make me
They can't make me
Things are so good, no need to run
Heard them talking conversations
Things that they don't know about
They're so high on speculation
They don't even know what come out their mouths Got this fire in my soul
It's saying they'll never say I told you so
And it burns so much more
Than when they understand my love and they know They can't take me
They can't take me
Take me to that place where we go
They can't make me
They can't make me
Things are so good, no need to run
They can't take me
They can't take me
Take me to that place where we go
They can't make me
They can't make me
Things are so good, no need to run
