Sink

The Superjesus

settle in settle down
don't throw your weight around
sow the seeds carefully
but don't come down on me
blinded bloodshed
sinking in the sun
lifeless fearless
be the only one
blackest sun blackest night
shades of scarred delight
wash away all your sins
where does the end begin
CHORUS
hands on and off the gun
you're not the only one
step away now step aside
just to leave you open wide.
