

Womankind

Little Angels

I recall I called you up to ask you all my questions
and you replied you don't know why I can't take rejection
When I'm alone in company, and you're there in my sights
you smother me in mystery one more time.

[Chorus:]

Woman, woman, woman, womankind
Everyday you seem to blow my mind
Take a look at me and you will find
Everyday I love you more
Everyday I want you more.

So sweetly you persist in kind, so darkly and mysterious
can't you see you must be blind, to not see I'm delirious
Fortunately you are not, a desperate proclaimer
That would be the worst thing on my mind.

[Chorus]

It's not the same without you
It's essential what you bring
You are deep within all time and space above
I just can't live without you, you're my oxygen supply
I'd drift deadly through my life without your love.

[Chorus]
