

# People Should Smile More

[Newton Faulkner](#)

People should smile more  
Im not saying theres nothing to cry for  
But you've got everything laid out for you  
Just close your eyes, take a deep breath and start another war  
Keep buying, keep moving, this city is sitting  
Next to me, we're laid out, it's gonna come  
One thing is certain  
I can't change the world  
Cause tryin' to make a difference makes it worse  
It's just an observation I can't ignore  
That people should smile more  
And people should smile more  
But the lights are so bright that they blind you  
Just one more meaningless scientific breakthrough  
The more we know, the less we care whilst damaged on the way  
Keep moving, keep buying, this city is sitting  
Next to me, well laid out, it's gonna come  
One thing is certain  
I can't change the world  
Cause tryin' to make a difference makes it worse  
It's just an observation I can't ignore  
That people could smile more, people should smile more  
I can't change the world  
Cause tryin' to make a difference makes it worse  
It's just an observation I can't ignore  
That people could smile more, people should smile more  
I can't change the world  
Cause tryin' to make a difference makes it worse  
It's just an observation I can't ignore  
That people could smile more, people should smile more
