

What It Is

Meadowland

I'd like to tear holes in the sun
make this reality come undone Make it all new again
Take you to the surface
You could breath in and
We all know
You could eat us all Melting my head
In my head there's a song
Only way to do it is to do it head on
And it is what it is what it is
We must take care of things bury them all
Only way to do it head on in a song
And it is what it is what it is I'd like to tear holes sun
something so unreal all this never happened I wish I saw it
Back in you
Waiting for the cloud make you
Drift away
When your back
You will eat us all Melting my head
In my head there's a song
Only way to do it is to do it head on
And it is what it is what it is
We must take care of things burry them all
Only way to do it head on in a song
And it is what it is what it is
