

Nihil Sine Causa

Eths

bones are too thin.
you are the cross.
face failed, this silent day, an angel say.your pain is sharpened by your own muddled mind.
try to trap the devil inside.
10000 dead black kidneys leave my hands.
it's raining flesh.(arabic language that I don't know really) fights on canaan's plain.
iced coffins.
psychotic plague.
drowned virgins.
god died here yesterday.
origin of signs.
falling gravity purloins the time.
last tries.
my angel, I promise you will fly someday.resurrection, god particle.
masse's missing, awake!!
billions of years, lost matter.
dawn of celerity.
chaos theory.
light's aggression.
our catharsis in dust.(arabic language that I don't know really) night, on canaan's plain.
eyes on skins.
hypnotic place.
ruled by sin.
god died here yesterday.
god died.
origin of signs.
falling gravity crack holy phi.
late cries.
my angel, I promise, you will fly but sadly miss the sky.
don't swallow the last shadow!!
I promise, we will supply for last days.iced virgins now are falling.
eyes on skin made them too thin.
night's virgins, throat filled by sin.
eyes on skin made them too thin.
iced virgins, flee my skin.fights on canaan's plain.
iced coffins.
psychotic plague.
drowned virgins.
god died here yesterday.origin of signs.

falling gravity purloins the time.

last tries.
