Dreams

Scholarman

(Opening dialogue)

CHORUS X4

As we do it like this,
Keep it going like this.

1st Verse

Freedom what I?m dreaming of / at all times thinking of / reach ultimate ecstasy like making love / the slightest touch / help my people a must / put my soul out of front / for our needs and wants / for our hopes and our dreams / visions of finer things / humanity for all / respect for human beings / got love for my brothers / even though some hate / keep it real with these cats / even though some fake / lets keep it going?

CHORUS X3

As we do it like this,
Keep it going like this

2nd Verse

Back and forth / the struggle will never end / gotta be flexible / at times we bend / only befriend real cats / that?s making some real moves / not hanging in the streets / living life like fools / I?m not judging anyone / just setting a new standard / a lot of things gone change since I landed / I?m demanding a change all over / real hip-hop / recruit new soldiers / a new mission / adjust new visions / make moves / do this thing with precision / I listen to guidance / pray / close my eyelids / meditating for a cease in the violence.

CHORUS X3

As we do it like this,
Keep it going like this

3rd Verse

I?m dreaming of a better world / my child can live in / where its safe to walk the streets / not a deadly decision / a system for the people / and not for the paper / I?m talking real leaders / not these known fakers / real solutions at real debates / execute / put them all in place / no matter what your race / skin tone or your state / we all got a birth indeed a death date / we wake to the same sun / sleep to the same moon / a greater change gone come yes its real soon

CHORUS (repeat)

As we do it like this,
Keep it going like this
