## Pop Rock And Roll

## I See Stars

I gave you time because I thought you had to think it out

Now your head is all filled up with doubt

Surely there would be assurance by now

I am comfortable with the unpredictable

In this place, I sense contagious

And I see a face

I can't contain this

I can't contain this, no Yeah I'm just a kid

But I can be tall

I can be anything at all

I can be yours

You can be mine

Just for tonight I swear that it will feel right I look at her picture (I look at her picture)

Remembering other times in life

And I know that no one is listening

But, I have something I want to say

Tonight I met the one that hoped for me

Got closer, she's over

And tonight I met the one that hoped for meI close my eyes

I see her in my mind now

Looking through the ups and downs

Searching for a turn around

Surely there would be assurance by now Yeah I'm just a kid

But I can be tall

I can be anything at all

I can be yours

You can be mine

Just for tonight I swear that it will feel right I look at her picture (I look at her picture)

Remembering other times in life

And I know that no one is listening

But, (I know that no one's listening)Tonight I met the one that hoped for me

Got closer, she's over

Tonight I met the one that hoped for me\*We gaze upon the glowing sky

Wishing this last kiss wasn't our last goodbye

I pushed myself to follow the truth

That my last night could not be with you\*And I'll sing to you

'Til it's over

Now it's over

And I'll to you

'Til it's over
Now it's over

'\*But I'll sing for you\*'
Forever
And ever!{Fade out}
