

Sister Honey

Stevie Nicks

Alright, baby, well, I think you will like Sister Honey
She will help you make up your mind
Even if you don't need her, tell her you need her
She needs you brother, she needs you brother Strange fascination some kind of temptation
To know Sister never having allowed yourself
Do you understand the word, pleasure
Well, you say it's just never crossed your mind
And she believes you Can we still be friends, the answer's always yes
Even best intentions turn around one day
Saying Nobody's right, baby, all the time
And a fool never knows what he's leaving behind
So take some time to know the real story
'Cause a soul that's true is your ride to glory
Don't let that golden hair get in your way, baby Can we still be friends, the answer's always yes
Even best intentions turn around one day
Saying Come back solemn stranger it's your last chance
She's almost gone, now and she'll go fast like a jet plane
And then fast like a star stream she'll hit you with a fury
Whispering the words one more time, baby, one more time
And she says don't let that golden hair get in your way now
