Mosquito

Sr-71

You like when we go fast So my foot's on the brake, used to be my girl But now you're just my worst mistake You don't see it, not a subtle change Makes me laugh, you turned into a cliche Every time you told me That we'd never say goodbye, was a lie You knew what to expect from me Just like a hit of ecstasy You made me high You think I still want you After all you put me through You think I can't walk away And find someone better for me Just take your overactive ego Shrink it down like a mosquito Baby, lovin' you was such a chore 'til I got bored

Now I don't think about you anymore From the first time I saw you naked I could see the future I knew that my world was shaken Lost my innocence then I lost my mind Thank God now I see 'Cause with you I must have been blind 'cause Every time you told me That we'd never say goodbye, was a lie Just like a common criminal You gave me just the minimal to Keep me hanging on inside Now that I can breathe, I'm done with therapy It's your turn to burn, covered up in lies And still so full of pride, I hope you choke 'Cause it's the sex I'll miss the most
