Natural Disaster

Example

My friends say think of the bad things
My friends say think of the fights
And then it should be easier to walk away
No more sleepless nights
And even though I don't need you
Your clearly the best thing that happened to me
We should be happy ever after
Happiness and laughter
What a natural disaster
You're far too good for me
Said you're far too good for me
We should be happy ever after
Happiness and laughter
Need to tell myself I don't care
Need to tell myself you're not there (x2)
Need some air, need some space(x4)
Need some air
The way I'm feeling I just don't care.
And even though I don't need you
You're clearly the best thing that happened to me
We should be happy ever after
What a natural disaster
You're far too good for me
Said you're far too good for me
We should be happy ever after
Happiness and laughter
What a natural disaster
Oh what have we done now
Oh what have we done (x2)
Don't take you for a fool, never
We been floating down a one way river

No way back can't paddle upstream
I suppose I had a fucked up dream
Had enough of you, had enough of me
What can I say I'm in a one man team
Schemin' dreamin', wheeler dealing
Feeling strange, I'm in love with the scene
General malice, seminal talent

Too many brain cells, chemical imbalance
One day soon I'll get it all examined
'Til then I'm going all Biff Tannen
Re-write the future, new ruler
Too cool now, well it don't suit ya
This is Starship Trooper living on a whole other planet
Reboot computer (x5)
Need to tell myself I don't care
Need to tell myself you're not there (x4)
Need some air, need some space (x4)
Need some air
The way I'm feeling I just don't care
And even though I don't need you
Your clearly the best thing that happened to me
We should be happy ever after
Happiness and laughter
What a natural disaster
You're far too good for me
Said you're far too good for me
We should be happy ever after
Happiness and laughter
What a natural disaster
We should be happy ever after
Happiness and laughter
What a natural disaster.
