

Side By Side

Squad Five-O

You & me growin up together
Side by side it'll last forever
We'll make it last, you know that I mean it
I pray to God that nothing comes between usI never thought that I could feel this way
About another human being
I know I said I'd never write a song like this
But something deep inside me brought me to itAnd so, I wrote this song for you
Growing up you've always been by my side
To hell and back we've been there at least a million times
Now I know you're the only one for me
In God we trust, true love & purityI never thought that I could feel this way
About another human being
I know I said I'd never write a song like this
But something deep inside me brought me to it
