Glow In the Dark

Diggy

Can you see me glow in the dark
I'm one with the stars, and never too far
YeahAnything worth living is worth dying
Anything worth getting is worth trying
I put myself in the shoes of a giant
With double tube socks, two knots and I tied it
I was frightened, I was tired
But I knew that one day I would triumph
Heard of making noise
All it took was one guess
Now I'm blowing like the wind
Underneath her sun dress
Ah yes, I can smell the victory
They used to pick at me
Now they picking me
To be the one to hold the torch that liberty
I'll tell you every detail till I see that vividly
I tried to warn y'all since airborne
I'm cold like I left the air on
I'm dope, I'm dope heroin
And the world's gonna know from here onCan you see me glow in the dark
I'm one with the stars, and never too far
Yeah
I can see you closing your eyes
So don't be surprised
All it takes is a spark
Till I glow in the darkI illuminate, I shine
Nothing happens before its time
And its time, its time, its time I glow in the darkI illuminate, I shine
Nothing happens before its time
And its time, its time, its time I glow in the darkI never let them tell me what I can do
God won't give me anything I can't handle
One candle can light all the rest
I'll live forever like I got a bite on my neck
Through my music, through my songs
This is your amusement, this is my psalms
My God, forgive them for adultery
Diggy underscore simmons do you follow me
Do you dig me, do your history

This didn't happen over night, quite the contrary
I've been working all my life
You hear what you hear
I work hard to get it right
They can measure light, but can't measure darkness
I ain't earn my stripes, that's preposterous
First I couldn't grab 'em but look at how I have 'em
It started with a thought and you thought it couldn't happenCan you see me glow in the dark
I'm one with the stars, and never too far
Yeah
I can see you closing your eyes
So don't be surprised
All it takes is a spark
Till I glow in the darkI illuminate, I shine
Nothing happens before its time
And its time, its time, its time I glow in the dark
I illuminate, I shine
Nothing happens before its time
And its time, its time, its time I glow in the darkMaurice Freehill once said
Who is more foolish?
The child afraid of the dark
Or the man afraid of the light
Glow in the dark
Don't fret, For everything around you is within you
Illuminate
Glow in the dark
Glow in the dark
Glow in the dark
