

Glass Half Empty

[Jonatha Brooke](#)

I hope you're happy
I hope you're happy with your glass half empty
Even though you got your share I hope you're happy
I hope you're happy with your glass half empty
Even though you got your share Kevin you remind me that the I's don't drop the names
Of those who've come before
Ear down to the ground don't compromise
Don't close your eyes until you get what you came looking for And Kevin you remind me don't look back, don't
second guess
Have another go, have another drink, 'cause it won't be long
I look down at my hands and saw the violence
So I toss it back, it's such a fine line between right and wrong And when you've made your mark
They'll take you down
And when you've had enough
That's when they'll come around
(Waiting at the pearly gates) I hope you're happy
I hope you're happy with your glass half empty
Even though you got your share I hope you're happy
I hope you're happy with your glass half empty
Even though you got your share Day strains into day like so much water through the tea leaves
What a shame and there's another call that's not for you
And Kevin there was a reason in the madness
There's a reason in these lines and rhymes
A reason in the curve of the time As I say you made your mark
You took yourself down
And I hope you got enough
'Cause we're still around
(Trying till we get it right) I hope you're happy
I hope you're happy with your glass half empty
Even though you got your share I hope you're happy
I hope you're happy with your glass half empty
Even though you got your share I hope you're happy
I hope you're happy with your glass half empty
Even though you got your share I hope you're happy
Hope you're happy with your glass half empty
Even though you got your share I hope you're happy
Hope you're happy with your glass half empty
Even though you got your share I hope you're happy
Hope you're happy with your glass half empty

Even though you got your share
