No Matter

Overproof Soundsystem

I saw a tear in your eye To let you walk right out of my life How could I be so glad Just watch you break down and cry (But now it's time) To let you know Now it's time What's on my mind That I I never knew love like this But no one will ever love you more I promise you this No matter what else may change Oh... No matter what comes my way Nothing will change Is neverending The way I feel My love for you And no matter what I'll never stop loving you I know that I need to try To let you run and let you hide To realise what I was doing Without you my life's not worth living I got this fear deep inside It's in my arms that you belong And now... I know I understand What we have now complete You're my everything I need And you It's only you yeah [CHORUS] Who turned my darkness into light Who made my day ran smooth (Give me strength) Give me strength to carry on (Give me hope) Give me hope when all is gone No matter what I'm gonna give you love 'Cos baby I will never stop loving you yeah it's you No matter what comes my way Nothing will change No matter what else may change My love for you The way I feel Is neverending And no matter what I'll never stop No matter what comes my way No matter what else may change..
