

# Man on the Moon

## Sugar

It's the man on the moon  
Saying goodnight to you  
And oh, how it shines  
He's a good friend of mine  
He's a good friend of yours  
Even many miles away I hope he comes soon  
It's the man on the moon In a night of despair  
Only one light is there  
It's the man on the moon  
Saying goodnight to you  
If you're holding my hand  
As the earth turns to sand I see your face, I see that look on your face  
Don't you know that space is the place  
I see your face, I see that look on your face  
Don't you know that space is the place If you look to the sky  
Look him straight in the eye  
And as strange as it seems  
If you wish all your dreams  
Will come true after all I see your face, I see that look on your face  
Don't you know that space is the place  
I see your face, I see that look on your face  
Don't you know that space is the place It's the man on the moon  
Saying goodnight to you  
And oh, how it shines  
He's a good friend of mine  
He's the one
