

Industrial Sickness

Abomination

Dumped in rivers, poured in sewers
Industrial sickness, industrial sickness
Crude misgivings, ruthless burnings
Industrial sickness, industrial sickness
Demented prophets polluting nonstop
Industrial sickness, industrial sickness
Destroying creatures, misleading preachers
Industrial sickness, industrial sickness
Lacerating the fruits of earth
Manipulating the people who serve
Infuriating protectors of nature
Destroying forests for trial and demand
Jeopardize the fate of human kind
Morbid views and indiscretions
Unify the cause and redesign
Techniques to reserve the damage
Subsidize our nature
Realign
Values of the rich demanding
Progress is start of our decline
Industries at fault, it's treason
Unrooting the trees, and abusing our needs
Burning excess, destroy our atmosphere
Polluting the oceans, and taint our supply
Absorbing the chemicals, pledging to fry
