Your Heart

Matt Mays

Do me a favour if you got nothing to do
Follow me outside this party don't seem right for you
Your boyfriend's drunk, he's passed out on the ground
So follow me out to where nobody's aroundYour heart and mine should really spend some time together
The blood'll be flowing through our veins like a stream in stormy weatherI feel it in my blood and in every one of my veins
From the end of my toes to the very back of my brain
Your boyfriend's drunk, he's passed out on the ground
So follow me out to where nobody's aroundYour heart and mine should really spend some time together
The blood'll be flowing through our veins like a stream in stormy weatherYou're done with this due and I do believe it's done with you
But if you're leaving now, would you mind if I came along too
'Cause everybody's drunk, they're passed out on the ground
We could go out to where nobody's aroundYour heart and mine should really spend some time together
The blood'll be flowing through our veins like a stream in stormy weather
(repeat)
Blood'll be flowing through our veins
Blood'll be flowing through our veins
Blood'll be flowing through our veins like a stream in stormy weather
It should be better
