

You Want Me (Norty Cotto Extended Remix)

Chantal Chamandy

when I walk down the street
everyone can feel the heat
I know how to drive you out of your mind
I know what your thinkin' when you look in my eyes I've heard every line so don't waste my time
I'm lookin' for the one the only one
if I smile and turn away
maybe this is your lucky day you want me, maybe baby I want you to
words won't keep me if I don't believe in what I see
if you catch me will you know what to do with me
you want me and maybe I want you
I like them funny, sexy and smart
I want a lover with a big big heart
if you're the one that's made for me
my name is Chantal, ya habibiall or nothing is the way I live
I take nothin' for granted and I love to give
I'll never change, I love who I am
I need a real man
you want me, maybe baby I want you to
words won't keep me if I don't believe in what I see
if you catch me will you know what to do with me
you want me and maybe I want you
