Supersonic

Ghettobillies

You see it you can feel it
and you open up inside
Like the lightning that's so frightening
Just before the thunder writhes
its a supersonic tonic
and its here to save the day
coming next is stereophonic
find your mind to blow away
All the things that wear you down
All the things you want to say
Its the juice that makes you loose
Illusion finally drive away

It's gonna take you higher and lift you off the ground
Our candy coated flyers are never coming down
Its coming on the wire, we're coming to the town
We move like dancing fire
And we move at the speed of sound

So when you hear the rumble
Get ready for the light
Like mother nature's mumble
Before you see the white
the brave that had to tumble
Like a key tacked to a kite
Your house is gonna crumble
We explode like dynamite
All the things that weigh you down
All the things you want to say
Its the juice that makes you loose
Illusion finally drive away

It's gonna take you higher and lift you off the ground
Our candy coated flyers are never coming down
Its coming on the wire, we're coming to the town
We move like dancing fire
And we move with the speed of sound
