

She's Gone

Nicholas David

Everybody's high on consolation
Everybody's trying to tell me
What is right for me, yeah
I need a drink and a quick decision
Now it's up to me, oooh what will be

[Chorus:]

She's gone, she's gone
Oh, why
Oh, why
I better learn how to face it
She's gone, she's gone
Oh, why
Oh, why
I'd pay the devil to replace her
She's gone, she's gone
Oh, why
What went wrong

Get up in the morning, look in the mirror
One less tooth brush hanging in the stand
My face ain't looking any younger
Now what I can see
Love's taken a toll on me

[Chorus]

Think I'll spend eternity in the city
Let the carbon and monoxide choke my thoughts away
And pretty bodies help dissolve the memories
There can never be what she once was to me

[Chorus]
