## Scorpio Rising

Power, dizzy with it stumble  
Detail, a chance for us to quarrel  
Anger, my head is shaken violent

If I could calm or restrain youFor the sake of pity, save the pistol

Save the cynics tongue  
Save the cool white stare

And take me to an honest face sometimeAmaze me nowTrust is the greatest human error

Empty, used me as a vessel

Ruthless, you're not known for subtlety

If I could calm or restrain youFor the sake of pity, save the pistol

Save the cynic's tongue  
Save the cool white stare

Take me to an honest face sometimeAmaze me nowArtful, well there's quite a skill to torture

A half smile, was it all you could deliver

Token, so hard to be pleasant

If you could calm or restrain itFor the sake of pity, save the pistol

Save the cynic's tongue  
Save the cool white stare

And take me to an honest face sometimeAmaze me nowAmaze me now, now, now
