Seems So Heavy

Sloan

There's an aircraft
Somewhere down by the river
The thing ran underground
It was completely soundlessUntil we cut it down to size
And then we galvanized it
By staring through the sky
And it keeps me flying highHead to head we're staring equal, sharing empty eyes
You've given everything to me
So if you really have to take off
I guess, there's nothing I can sayExcept, I can't believe you're playing this quiet
It seems so heavy
I didn't believe you're playing this quiet
It seems so heavyTake a look around
(Take a look around)
You maybe, think that you found usBut nothing lies like no parade for the highest grade
It's time to call a spade, a spade
And it takes a while to realize
That everything around you is too beautifulShe keeps me out of telling lies
And understands that giving personality
Is what she's done for me
Oh yeahI can't believe you're playing this quiet
It seems so heavy
Watch you from below, I'm reminded
My girl is readyI can't believe you're playing this quiet
It seems so heavy
Watch you from below, I'm reminded
My girl is ready
