Eclipse

Holyhell

Past the sun, cast out of heaven
Did the black horde fly?
Down to earth, souls for the taking
On the wings of the nightThrough the kingdom of fire and darkness
We are free from the light
In the bowels of the earth
We are waiting, here we chose to alightTo the eclipse
Free from light, into dark, into night
To the eclipse
Know us well, we who fell
We're angels from hellFrom the chaos a disguise,
A plaque will fill the skies
Armies born of fire shall arise
And now the sons of hell await
For all who share our fate
To live among the creatures of the nightTo the eclipse
Free from light, into dark, into night
To the eclipse
Know us well, we who fell
We're angels from hellPast the sun, cast out of heaven
Did the back horde fly?
Down to earth, souls for the taking
On the wings of the night[Chorus:3x]
To the eclipse
Free from light, into dark, into night
To the eclipse
Know us well, we who fell
We're angels' from hellTo the eclipse
