

The Orbiting Beatnik

Julee Cruise

EahNow paint a way to think we're the only ones that exist

 This beautiful planet that races through

Space and time as we stand still, yet, we're not still

 There's something out there

 Something bigger, better, stronger

There's something out there, I know we're not aloneYeah, we're not alone

 Yeah, we're not alone

 Yeah, we're not alone

 Yeah, we're not alone

 Yeah, we're not aloneLook up to the stars, the answers are there

 But, why do we ask ourselves when will spirits dwell amongst us

 They're here already, I can feel their danse in a starry night

 A sea of life dwells as their spirits fly

Then I know, we're not alone, we're not aloneYeah, we're not aloneAnd there's the great wall

 They all seem to be gravitating towards it

 It's not some nebula, it's not, it's just a mass cluster of stars

 It's a great wall far, far away from every galaxy you can ever imagine

 It, there's no end to it and I know there's something out there

 It's not just us
