

Tin Foil Hats

Astronoid

Awake we dream through life
The morning awaits us
The sun blooms with radiant light
Beautiful waves shine upon us
This new breath fills my lungs with new hope of change
Embrace me
My heart is open
The clouds will part the sky
The sun shines on my face
You seek out
The missing piece
Find out
What's gone from your heart
Was it there before?
Find out
What love left you
We are free
A new day
The sun shines bright for us
