

Work It

Monrose

I'm gonna tell you how it's gonna be
One night, is all you say that you been hoping for,
Oh yeah, yeah,
Won't beat your traffic
You know I'm looking out for something more
Oh yeah, yeah
If you think you getting this
On the first night we kiss
You're mistaken (mistaken, yeah, yeah)
Something cute, I get you some advise
And how to proper be taken (oh no)
You got to work it in the day,
Work it in the night
Work it in the little things you do
To treat me right
Show me that you're caring
What you do and what you say
Work it, Work it, Work it
That's the only way
Don't get me wrong
You know I like to have a good time
But when it comes to a man
I'm a sin, I never compromise
You got style, you got best
But you moving to fast
For me baby
Slow it down, maybe I'll come around
Do you hear what I'm saying
Oh yeah, yeah, yeah
You got to work it in the day,
Work it in the night
Work it in the little things you do
To treat me right
Show me that you're caring

What you do and what you say
Work it, Work it, Work it
That's the only way
What you got to give is real

What you say is what you feel
Time will only bring us together
Got to be a number one
Give us nothing to hold on to
Uh, boy you got to work it
Work it day by day
You got to work it day by day
You got to work it in the day,
Work it in the night
Work it in the little things you do
To treat me right
Show me that you're caring
What you do and what you say
Work it, Work it, Work it
That's the only way
You got to work it in the day,
Work it in the night
Work it in the little things you do
To treat me right
Show me that you're caring
What you do and what you say
Work it, Work it, Work it
That's the only way
You got to work it in the day,
Work it in the night
Work it in the little things you do
To treat me right
Show me that you're caring
What you do and what you say
Work it, Work it, Work it
That's the only way
