

# You

## Tv On The Radio

You

Gave no reason for letting go  
I just thought you might like to know  
You're the only one I ever loved

True

We've demolished a thing or two  
But it seemed like the thing to do  
And you're the only one I ever loved

Comes to know

Though the feelings were half where we lied

Comes to be wrong

In our dreams we were making it right

But you

Threw your hands up and walked away  
Seems strange I could feel this way  
You're the only one I ever loved

Comes to know

Though the feelings were half where we lied

Comes to be wrong

Though the secrets were safer at night

Come, sugar, home

Stow your feedback and take inside

Cross your heart

In our dreams we were making it right

But you

Threw your hands up and walked away  
Seems strange I should feel this way  
You're the only one I ever loved
