

# If There's Still Snow

## FOMA

Be we were born in the winter unsuspected we roll up our sleeves  
You made me yours by December, I fell fast I was only sixteen  
I defended you a million times, you put up with my countless lies please just give me a chance  
I tried my best to answer why I'm gonna make the sacrifice so let these words be my last  
But if there's still snow and I'm alive will you still let me call you babe  
But if there's still snow and we both survive will you live in this wasteland with me

Love we dried up by October of lust and then lost even hands  
We try and we try and we try over, I think eventually we'll understand  
Our friends have tried to make us quit, but we never really get far away enough  
And so we've had some big disputes but what's the use to try to lose instead let's try our luck  
But if there's still snow and I'm alive will you still let me call you babe  
But if there's still snow and we both survive will you live in this wasteland with me  
With me, live here with me

If you are reborn this winter, schizophrenic and slippery snow  
A season if I've ever known one, I've braved this now it's time for me to go  
So let's get reborn this winter, we can be like virgins again, when this song is finally over  
We can spend life together as.....friends  
But if there's still snow and I'm alive will you still let me call you babe  
But if there's still snow and we both survive will you live in this wasteland with me  
But if I'm old when I die, will you make sure that the service is brief  
But if I'm old and your by my side, will you turn off the lights, make sure were at peace  
(Make your sure were at)  
Peace
