Feels Like a Lie

Joywave

When the time came, they put me in my place
Red x'd, discarded and replaced
And being human, I'll let it go someday
But I've got it stored above my ribcage

Now that this newborn terminal moves
Now that there's all this logic removed

It feels
It feels like a lie
It feels
It feels like a lie

My voice floats across on a wave
While my mouth is motionless and strange

Now that this newborn terminal moves
Now that there's all this logic removed

It feels
It feels like a lie
It feels like lie
