

# Older

## They Might Be Giants

You're older than you've ever been  
And now you're even older  
And now you're even older  
And now you're even older You're older than you've ever been  
And now you're even older  
And now you're older still Time is marching on  
And time is still marching on This day will soon be at an end  
And now it's even sooner  
And now it's even sooner  
And now it's even sooner This day will soon be at an end  
And now it's even sooner  
And now it's sooner still You're older than you've ever been  
And now you're even older  
And now you're even older  
And now you're even older You're older than you've ever been  
And now you're even older  
And now you're older still
