

Blow Up

Slut

let wait until the morning light then give me pills for one more try wel be over let place the bomb and stop to breathe let wait until the city sleeps wel be over when it over - blow up Il light the fuse at ten to eight then count to three and run away wel be over when it over - blow up please steal a car and grab your coat then give me five and hit the road wel be over when it over - blow up Il kill the world for you today wel place a bomb and drive away
