Futures

Radiation City

You came, you saw, your video, your video
The video of when you were a little one, little one, a little one
They came, they saw, and everyone, everyone, everyone
And made you feel really small, oh really small, really smallDancing on a screen, making fun of a million things
Tell me not to cry, but I know I have to try
You are my life, you were my lifeYou came, you saw, your video, your video
The video of when you were a little one, little one, a little one
They came, they saw, and everyone, everyone, everyone
And made you feel really small, oh really small, really smallSummers were happy when you're easy
Never could listen echo in the thunder, thunder
You are my life, you were my lifeYou came, you saw, your video, your video
The video of when you were a little one, little one, a little one
They came, they saw, and everyone, everyone, everyone
And made you feel really small, really small, oh really smallYou came, you saw, your video, your video
The video of when you were a little one, little one, a little one
They came, they saw, and everyone, everyone, everyone
And made you feel really small, really small, really small
