

# That's Why

## Raised Fist

Take a look at today's headlines  
Usual signs but in different designs  
I don't believe in these stories with my heart  
Director of important needs  
Of course the killing proceed  
Profit is the thing that I'm sick of  
Morbid tourists spend their money with love  
That's why! - I look upon this with fascination  
As you try to fill me with the wrong information  
That's why! - We love to lead all the conversations  
This can't be for real this must be a bad imitation  
We cannot play this game by their rules  
Cannot provide them with the powerful tools  
Another black paper with so called news  
Another excuse to light the fuse  
Treated like an object without a mind  
Feeling like a product left behind  
How can we laugh being this mistrusted?  
Question makes me disgusted  
That's why! - I look upon this with fascination  
As you try to fill me with the wrong information  
That's why! - We love to lead all the conversations  
This can't be for real this must be a bad imitation  
I look upon this with fascination  
As you try to fill me with the wrong information  
That's why! - We love to lead all the conversations  
This can't be for real this must be a bad imitation
