

Our Time Won't Live That Long

Madrugada

Don't know when they put me in the ground
I don't know if I was left alone
All the matters that I follow you
On my way to the unknown bound. It's cold baby but I'm not afraid
I feel lost my life swept away
I've been worried but I promised you
It's so tense when you're in the life Only time that you walked away
It was me, I'm always here and I'm gonna stay
Lovin' you can not be bad
My blood is boiling and you make me mad I was flying but it was very low
You let your lovin' coming down
And all I thought it was just another dome
Couldn't be right what I found
A mountain top, it's the need of time
I'm out of my mind so let's make this night
On my own every thing is wrong
Holding on now, I'm holding on. You just have to call it out.
You know your love until your love is gone
And you know that it, that it's that strong Only time that you let me down
You just wouldn't let me in
It's only time when it all went bad
I don't wanna fight with you Don't you know why I do
I will never ever let you go
I will stay with you till I die If my blood runs cold I don't wanna know
I'm gonna cry all night long
I wear your heart until my heart is torn
Then I make up, make up my mind.
When all is gone we just stop below
Where we go when we just gotta blow
Everything that we got in here
Don't wanna see you walking down the stairs Cause I need you and you know you need me
It's all that love that you let down on me
Hold me tight and I love you right.
I love you, I'll be there, baby, baby mine Honey, our time won't live that long You know our time won't live that
long You know our time won't live that long
