

# Green Leaves

[Raheem Devaughn](#)

Life, life is about evolving and growing  
Elevating, constant growth  
Like green leaves  
I dedicate this to the children  
Mama told me a wise man leads and never takes orders to follow  
And what's done right here in the here and now, always affects tomorrow  
It's like, 'cause and effect, simple mathematics like 1 plus 1 makes 2  
See the bed that we make, that's where we got to lay  
So be wise of the path we choose and keep growing  
Keep growing, keep growing  
Keep growing, keep growing  
Like green leaves  
To have it you got to see it, to talk it you got to be it  
There's no if, no ands or buts  
If you claim it you can attain it, what was made shall be  
And that's the law of the universe  
Shine a light, use insight and remember you're precious gift  
Take the good with the bad  
The tears with the laughs and always be positive  
And keep growing  
Keep growing, keep growing  
Keep growing, keep growing  
Like green leaves  
Keep growing, keep growing  
Keep growing, keep growing  
Like green leaves
