

Back Then

The Holdup

Yeah I remember being kids, we did it all night
I know it's dirty but the sun is on it's own, right?
I was so in love then, baby I could fall right
Back into that moment, if we let ourselves we all might

Well tell me what we're thinking
Sitting in our car, somebody else go get a drink and
Same girls we want all day when we're sleeping
Never seem to matter, 'way your body on the weekend

Baby, I've been missing those days
If you wanna come and find me look on memory lane, 'cause

I'll be cracking bottles and you'll be pouring champagne
Toasting on the good days when one was all the same
And I'll be young forever even when some things are bad
Life is one big party and I love the one I'm at

Back when we were younger, girl
And I know we're getting older
Well we're still just kids who went here
Let's just get it, this party over

And I know that we've been drinking
I see that you've been thinking
About the old days when I'm dreaming
About the ones when we'll be singing

About the love we had, the love we lost
Lives we want, but lives we crossed
Days when I felt like the boss
These memories they stay with you, yeah

Stay with us yeah
Stay with us yeah
Stay with us yeah ooh ooh

I know we were young and reckless
Pretty girl hangin' on me like a necklace
Think I'm in love, couldn't eat my breakfast

Stay up all night just to get her texts

Kinda tripping that we did it unprotected
No I can't sleep 'cause I'm so damn restless
Sixteen year and I've found my best friend
High school shit but I know I'm destined

To blow this all and be this big
I'll be proud of the things I did
No regret of all the things I said
But I'm still growing up and I'm still a kid

Can't tell me you don't miss those days
Back in the day now I'm back in the way
'Cause I'll never move forward if you ask me to stay
Keep reminiscing and I'm having to say that

Back when we were younger, girl
And I know we're getting older
Well we're still just kids who went here
Let's just get this party over

And I know that we've been drinking
I see that you've been thinking
About the old days when I'm dreaming
About the ones when we'll be singing

About the love we had, the love we lost
Lives we want, but lives we crossed
Days when I felt like the boss
These memories they stay with you, yeah

Stay with us yeah
Stay with us yeah
Stay with us yeah ooh ooh

Back when we were younger, girl
And I know we're getting older
Well we're still just kids who went here
Let's just get this party over

And I know that we've been drinking
I see that you've been thinking
About the old days when I'm dreaming
About the ones when we'll be singing

About the love we had, the love we lost
Lives we want, but lives we crossed
Days when I felt like the boss
These memories they stay with you, yeah

Stay with us yeah
Stay with us yeah
Stay with us yeah ooh ooh
