

Talk Show

Andrew Lipa

The whole world is watching me
As I light up the TV screen
My life a parade
But I got it made
I hope everyone will see I want my ratings to go up
I hope you all wish me luck
I act like I care
About your welfare
And I pretend I stay in touch I want to be on your good side
I got nowhere else to hide
Everything that you hear
May not be sincere
At least my voice is amplified I think my credibility has gone away
The colors on your television will turn gray
I make a living while I exploit everyone
I never thought this way of life would be so fun Please come onto my talk show
I share everything I know
