

Saw You Drown

Katatonia

As through your shattered eyes
It all came together
And your heart cries
Weeping through the weather Another way to change your mind
I'm weaker than they say
To leave this all behind
The only way to stay Don't you know
I'm the end of what we'll be
And right below us
The last things you'll see In the water
I saw you drown
Down the water
I saw you drown In the water
I saw you drown
Down the water
I saw you drown As through my shattered sight
You're no longer here
And my heart cries
Sleeping through the light Another way to change my mind
Never is the day
To leave it all behind
The only way to stay Don't you know
I'm the end of what we'll be
And right below us
The last things you'll see In the water
I saw you drown
Down the water
I saw you drown In the water
I saw you drown
Down the water
I saw you drown In the water
I saw you drown
Down the water
I saw you drown In the water
I saw you drown
Down the water
I saw you drown
