Headspace

Gavlyn & DJ Hoppa

Verse 1 -
My headspace never in one place
I always redefine a way to cease the day
oh my god, oh my lord I did it though
I got a heavy soul, for what it's hittin'for
True indeed, I'm the fresh breath of air you need
Uh huh, I got the key without the calibe
I'm thinking out the box, like I don't know was shade
now watch me formulate my words and concentrate
I like to speak with my hands or with my fingers and
when I let it out this shit gonna paint a picture
I'm a old soul in a modern world, I'm so oldschool without the jerry curls
See you can lace me up because I'm on my way out
You see what I'm about is just a payout
another grind another hustle that's it usasally
so DJ run it back I does it beautifully just for you to see

(CHORUS)
Aye my headspace, got me contemplating decisions of how I'm truly living
oh my headspace, got me looking at surroundings, got me feeling overcrowded will I leave I doubt it,
Aye my headspace, second guessing first impressions and what they really saying in a sentence
oh my headspace, got me preying to the universe with every bit of struggle man it's gotta work

Verse 2 -
Mama always told me I'm a rolling stone, she said you got a heart of gold, enjoy your growth
So every leap I take is not a leap of faith, it's a leap of certainty I truly made
I like to see the bigger picture and the schemes, the visions of my dreams and what they really mean
This ring and all that life lets answer all the questions
And everything I mention not a secret weapon
it's a peace mind a peace of openness, you need to have an open ear with closed lips
I love these imperfections like I'm clueless, and I see my happiness is on the hit list
Don't try to come up on me quick man it's gonna happen never, the way I like to see it
you are the least of my endeavours at any given time, at any given measure, not stopping in my tracks bruh I'd apply the pressure

(CHORUS)
Aye my headspace, got me contemplating decisions of how I'm truly living
oh my headspace, got me looking at surroundings, got me feeling overcrowded will I leave I doubt it,

Aye my headspace, second guessing first impressions and what they really saying in a sentence
oh my headspace, got me preying to the universe with every bit of struggle man it's gotta work
