## Twista

[Intro: x3]

Problems

Problems

Problems

Problems upset you[Verse 1: Twista]

When I'm on the track you will see accuracy

Actually I know that you will see I come like I got the fully

Automatic for the sent aggression of the problematic and negativity or whoever caused the static

Pick up a rose and sniff a scent if if you think it's magnificent

Stop the stressin or just catch a blessin if it

If it's bills or if it's rent some of us worry some of us don't that's why everybody so different

The only answer to you problems solve em

Stallin is the only thing that can stop a balla

Though world is full of hatred face it

Get out the matrix and let's get back to the basics

Instead of being individual let's practice a ritual and be an indivisible when it's critical

So every time that some drama hit yo doorstep

Gotta try to keep your composure and don't let[Chorus: x2]

Problems (Don't let)

Problems (You can't let)

Problems (You won't let)

Problems upset you[Verse 2: Tech N9ne]

I'm a problem because I'm different and people don't get it

When I be the clown like a sucka down when I be kickin' my music

Tech is dangerous if you think you can hang with us

Sick in your brain with it when I mangle it know that I break and abuse it

Have you prayin' to God

Cause what I'm sprayin it's odd

And I'm slayin this broad

Tech Nina's layin his ride

I'm insatiable when it comes to be makin this gouda

I'm a sniper killa murderer look out I'm a shoota

A dilema we takin out you beginners comin to my psycho cinema

It's a must that I crush them

If you accustomed to lovey dovey movies

Then you unlucky because they call me Tecca Nina the snuff film

Throwing the fist up

Cause all of my grips up

People was hating but now they zippin their lips up

Neva debated you imitated get ripped up  
Stuck off in Necropolis cause Tecca Nina and Twista's a[Chorus: x2]  
Problems (Don't let)  
Problems (You can't let)  
Problems (You won't let)  
Problems upset you[Verse 3: Twista]  
My alien complex can get as lethal as bomb threats  
When I put together patterns and concepts  
But when it come to dealin with pain and problems and relationships I ain't gonna lie, I ain't the bomb yet  
What do we need, what's the resolution  
Is it restitution or just retribution let's just start a revolution  
But wait, I'm hesitant because in fact  
How can I fight to be equal if the president is black and uh,  
A Chi Town resident at that  
Hope we focus on this instead of wars in Iraq  
The future is bright or will it be weary  
Do I need to pay attention to conspiracy theories  
Is the government systematically destroyin the population for the progress of one dominate nation  
Smile, even if the landlord callin'  
Dodge 'em, but that the least of your problems[Chorus: x2]  
Problems (Don't let)  
Problems (You can't let)  
Problems (You won't let)  
Problems upset you[Outro:]  
Try not to get worried  
Try not turn on to  
Problems that upset you  
Don't you know
