

# Black Butterfly

Laura Veirs

Goodbye, black butterfly  
You can take those perfect wings into outer space  
'Cause there's no place left in this blood  
For your restless fluttering, your sleepless waysBlack butterfly, flutter me by  
    Kick a little bitter into the night  
    Spark of the stars leaving on my heart  
Trying to be good by you, alright, alrightSalt breeze, rose city sunset  
    The bats are swinging 'round me like drunken ships  
    Ever, evergreen bows above me tower  
Singing quiet stories 'bout forgivenessBlack butterfly, flutter me by  
    Kick a little bitter into the night  
    Spark of the stars leaving on my heart  
Trying to be good by you, alright, alrightAlright, alright  
    Alright, alright  
    Alright, alright  
    Alright, alright  
    Alright, alright
