## **Autumn Tactics**

## Chicane

Deep river runs it's course to a warm horizon Shadows of falling leaves October moon and rusty skies, ever changing feelings The seeds of autumn in my mindThe hiding sun, like the hiding sun Feels like it's just begun The hiding sun, like the hiding sun Waiting for summer sunHiding summer's age no more No more leaves in summer sky Turning dark on empty carlots When summer was my only friendSail back this way again Winter's one breath away Sail back this way again Winter's one breath away It's turning coldLike the hiding sun, like the hiding sun Feels like it's just begun The hiding sun, like the hiding sun Waiting for summer sunThe hiding sun, like the hiding sun Feels like it's just begun The hiding sun, like the hiding sun
