We Must Have Blood

Dwarves

Bodies litter the highway
But that's just my way
Of telling you I'm here
So don't you fear
Don't fear my dear. Come near
Deep in the heart of Texas
The solar plexus
And the region down below
If you don't know
I'll flow the blow by blow by blow
It's not that we don't love you
It's just that we don't care
And when we're coming down beware
WE must have blood
WE must have everything we need
To stay alive and then we breed
We must have blood
WE must have everything
out on that lonely highway
out looking for a thrill
and where we're from it's kiss or
kill we will
we must have blood
they say that love is a drug
In love we lie like a rug
but when we come and we come
we must have blood
