

# Lifers

## Empires

They're relaxed dust in our eyes  
Or in the blur of enraged city lights  
My heart's a world of old woes

Some I recall and some that I don't Only way out's the way back in I remain on highways and small stages

That'll be the dream for me  
See my friends on jet planes and big stages  
And I wave and they'll wave back  
It's all I ask, it's all I ask  
I wake up ten years older  
Same war, the same fallen soldiers  
Where we've been is still where we had it  
Same place with a different name  
And the way out's the way back in  
I remain on highways and small stages  
And that'll be the dream for me  
See my friends on jet planes and big stages  
And I'll wave, and they'll wave back

It's all I ask, it's all I ask The only way out's the way back in.
