

Gravitational Lensing

Solution .45

Into what goes on forever
Beyond perspectives lost
Kaleidoscope vision
Introspective display
What hides in plain sightForce it into my head
Now is the only time
Hiding behind a lie
All I knowI cast the fire[Chorus:]
Inside these hours
All alone
For I am in denial
Though never again will I
Direct my shields
Against another
But turn it on myselfCome back
To something I need
Come back to misery
Living the misdirection
All I know
The further off center
My lies becomeForce it into my head
Now is the only time
Hiding behind a lie
All I knowI cast the fire[Chorus]No sight - unseen
No light - in between
Gravitational lensing
What they see
Is bent around my liesAround this black hole
I have found myself again
Brought out the answers
For my seeing eyes only
Travelling in circles
I have found myself again
No way to face it straight
Inside the lonelyHere in the night of nights
Where nothing shines
I brought the flame down
On it all - unforgiving
In time the flame will die

The only hope I have to find
To never deny, never regret
The masquerade is overAs long as I cast the fire[Chorus]
