

# One Thing

## Alicia Keys

What, where am i  
Whats life like on a train  
Nobody there knows your name  
As your decision changed  
Do you wish that I came  
I thought youd pick me up from work  
I waited for your truck for half hour  
I know you said you were gonna  
But I never thought youd leave  
This one thing that was made for us  
Chasing us, saving us  
Ill take one thing over everything  
Ill take that thing over anybody  
Square face and puppy eyes  
Foul mouth they never lied  
Your old man lived in the sky left you a house with a yard  
But you went away, a different try, find a place that's your size  
Too good to finish life here with me  
And I couldnt get you to say  
Why you wouldnt let me come

What should be simple just aint  
And it shouldnt hurt like it does  
This one thing is made for us  
Wont stay with us, it aint saving us  
But i'll take one thing over everything  
I'll take that thing over anybody  
Baby hold it off clear  
I need a complement, just a touch from a friend  
I need a gentle world  
I need your company  
Ill keep  
One thing that was made for us  
Chasing us, saving us  
I take one thing over everything  
I take that thing over anybody  
I take one thing over everything  
I take that thing over anybody  
Anything

Take one thing
