

Epilogue

(hed) P.e.

She says it's just not working out
She means she's found someone else
She says things are not the same
She means she's found someone else
She says that I need help
She says that I don't own her
What she means is that she's fucking someone else
She says we've got a lot of problems
She means she's found someone else
She says that she was with a friend
She means she's found someone else

She says that she is sorry
For the pain that I am feeling
What she means is that she's fucking someone else
She said she thought I was lying
She means she's found someone else
She say's she thought it was
She means she's found someone else
She says that I need help
She says that I don't own her
Seen the smile on her face
Coz she found another nigga
And she's bored with everything I've shown her
What she means is that she's fucking someone else
